PROFILE

Frontend Developer with commercial experience in building modern web applications using React, Next.js, Angular and TypeScript. Experienced in developing responsive and accessible user interfaces, API integrations and automated frontend testing. Passionate about clean, maintainable code, thoughtful UX and building reliable web applications with minimal dependencies

WORK EXPERIENCE

Columbus Poland 07.2026 - 01.2027

Junior Frontend Developer

Sales Assistant: an AI chat assistant feature that supports store employees in serving customers and recommending products (frontend).

- **Stack**: Next.js (App Router), React 19, TypeScript, Chakra UI, next-intl, Sanity CMS, commercetools, Web Speech API, react-hook-form + Zod, Cypress, Biome
- Developed the **voice recognition mechanism** using the **Web Speech API**: speech-to-text, language handling, microphone permissions, and a clean view/hook architecture.
- Built **the chat interface** with **voice** and **text input**, keyword tags and matching products, including the **interface behavior**: chat scrolling, session history with restored scroll position, and loading / error states.

Prototype: **Sales Assistant** (private demo, access on request) · **GitHub**

PORTFOLIO

House Staff

E-commerce storefront · **Live demo** · **Storybook** · **GitHub**

- **Stack:** React, TypeScript, Vite, TanStack Query, Context API + Reducer, SCSS Modules, Storybook, Vitest, React Testing Library
- Cart and wishlist for guests (localStorage) and signed-in users, with Google OAuth and order placement through a Node/Express REST API
- Responsive UI with code splitting, component tests, and components documented in Storybook
